Use of Operating Metrics

The operating metrics reported in this Presentation are calculated using internal Company data based on the activity of our merchants, consumers and other participants in our ecosystem. While these numbers are based on what we believe to be reasonable estimates of engagement, for the applicable period of measurement, there are inherent challenges in measuring usage across our large online, offline, in-store and mobile presence. The methodologies used to measure these metrics require significant judgment and are also susceptible to algorithm or other technical errors. We regularly review our processes for calculating these metrics, and from time to time we may discover inaccuracies in our metrics or may make adjustments to improve their accuracy, which can result in adjustments to previously disclosed metrics. In addition, our metrics will differ from estimates published by third parties due to differences in methodology.

We have converted financial amounts from ₹ millions into ₹ Cr and hence there could be some totaling anomalies in the numbers.

Growth and profitability are improving substantially

- Robust EBITDA growth QoQ (comparable basis), despite Q4 being a seasonally weaker quarter following the strong festive period
- Reported numbers are impacted by the discontinuation of the PIDF scheme, and FY 2026 UPI incentive is yet to be finalised
- As guided, we were able to offset 30-40% of PIDF impact in Q4 FY 2026

Growth Acceleration Accompanied By Margin Expansion

Revenue growth is expected to accelerate with further EBITDA margin expansion, driven by four compounding engines that are already in motion

- 1. Expansion of merchant payments**  Market share gains and expanding payment processing margins
- 2. Structural growth in high-margin merchant loans distribution business**  Expanding lender participation, growing device merchant base, and rising penetration
- 3. Consumer lifecycle monetization**  Monetisation momentum, on back of AI-led product innovation; will see full-year benefit in FY 2027
- 4. Continued use of AI across the organisation and AI-led operating leverage**  AI application across the organisation to further drive EBITDA margin expansion

Built the business with a strong foundation, reflecting industry-leading customer monetisation and cost discipline

A High-quality, Long-term Profitable Business

Positive impact of proactive and conservative compliance decisions reflected across recent regulatory transitions

- Nearly nil revenue impact from industry stoppage of rent payments through credit card (PA-PG guidelines, Sep 2025) and the Real Money Gaming (RMG) Act, Aug 2025 driven by proactive compliance
- Discontinued use of “adjusted” metrics; all disclosures are on GAAP basis or as per standard definitions, which drives appropriate resource allocation decisions
- Movement to conservative revenue recognition policy
- Offset a portion of PIDF non-extension beyond Dec 2025; will progressively mitigate through higher revenues and targeted sales efforts, while maintaining discipline on RoI and payback
- No financial or business impact from cancellation of Paytm Payments Bank Limited’s (PPBL) banking license. Investment in PPBL was already impaired as of March 31, 2024

*Note: Starting Q1 FY 2027, the Company will discontinue reporting the 'Average Number of Sales Employees' in its periodic disclosures. The Company believes that the cost of sales employees is a more relevant metric for evaluating the scale and performance of its sales organization. Given the industry trend of high attrition rates in the sales team and the variability in active working days across employees, sales employee cost provides a more accurate and meaningful representation than the number of sales employees.

Definitions for Metrics & Key Performance Indicators

Metric	Definition
GMV	GMV is the rupee value of total payments made to merchants through transactions on our app or our in-store payment solutions, and payments processed through Paytm payment gateway, over a period. It excludes any consumer-to-consumer payment service such as money transfers
Monthly Transacting User (MTU)	Number of unique users in a particular calendar month who have successfully completed a transaction on the Paytm App or have used the Paytm for Business App
Net Payment Revenue	Payment revenues (including other operating revenue) less payments processing charges
Contribution Profit	Contribution profit is a non-GAAP financial measure. We define Contribution profit as revenue from operations less payment processing charges, promotional cashback & incentives expenses, connectivity & content fees, contest, ticketing expenses & logistics, deployment & collection cost of our businesses
Key Financial Services customers	Key financial services customers are unique consumers and merchants who have availed Paytm's and group entity's financial services offerings, i.e. equity broking, insurance and credit products, such as merchant and consumer loans distributed through our platform. However, it does not include customers availing mutual fund distribution, Postpaid loans, gold savings or any attachment insurance products, as they contribute negligible revenue/profitability
